

# UV Stabilized 2D Trays

Overcome UV damage and simplify handling. Our ALLpaQ UV Stabilized 2D Trays are the perfect solution for protecting your bioprocessing bags from cellular structure damage caused by harsh UV light.

## Features & Benefits

- Use the front sliding access gate to easily connect draining tubes
- Prevent light from entering the tray while handling with external handles
- Trays are stackable for space optimization and hold up to 50L
- Use with our ALLpaQ Bag Tray Dolly or ALLpaQ 2D Bag Cabinet for efficient bag transportation
- Additional slope insert available for purchase to optimize draining
