

## What is FlexConnexx?

A revolutionary approach to the production of single-use assemblies.

FlexConnexx was designed to give our customers total autonomy over the production of their single-use assemblies – from concept to delivery. Modeled after contract development and manufacturing organizations (CDMOs) in the pharmaceutical industry, FlexConnexx offers a comparable way to build your assemblies.

## The Bigger Picture. Simplified.

Time is of the essence. The solutions we produce are used to develop lifesaving treatments. Decreasing lead times in the production of your single-use assemblies allows you to get your products to the people who need them, faster – **FlexConnexx ensures that you will.**

Flexibility

## Why Choose FlexConnexx? Security, flexibility and peace of mind.

We understand time is an essential factor in your business. FlexConnexx is a proactive approach based on collaboration and direct communication. The FlexConnexx partnership allows us to prepare for your future projects, preemptively building your solutions for exactly when you need them.

Instead of entering a production queue, your assemblies will be manufactured immediately in your dedicated cleanroom space, enabling you to meet deadlines stress-free. Simply put, FlexConnexx will improve your speed to market all while eliminating some of the common issues associated with traditional single-use assembly production.
